

## A young person's guide to treatment at Benenden Hospital

Benenden Hospital provides the best of care to children and young people - that's everyone from six months to 16 years old.

We have a spacious playroom/dining area overlooking our extensive grounds, well stocked with toys and games, where a qualified hospital play specialist helps to keep the youngsters involved and busy.

All our staff are child specialists and our accommodation is in 12 individual bedrooms in a dedicated ward with space for parents/carers to stay overnight.

Hospital Trust

We treat both NHS and private patients as well as Benenden Healthcare Society members. Our medical and surgical team specialises in a wide range of conditions, including ear, nose and throat surgery, endoscopy, dental treatment (NHS), dermatology and general surgery.

All our consultant paediatricians and anaesthetists work in the NHS. We have appropriate resuscitation equipment in theatres and on the ward. We network with the Conquest Hospital in Hastings and Great Ormond Street Hospital for Children should any additional support be needed.

Our work has been commended by the Royal College of Surgeons. We are one of the small number of BUPA recognised **independent** hospitals in the country who provide care for children under three years old.
